k. Description of Request: The licensee requests that the minimum flow requirements of article 105 of the license for the Tule Project be revised to reflect the requirements of the conditions submitted by the U.S. Forest Service (FS) pursuant to its mandatory conditioning authority under section 4(e) of the Federal Power Act. Article 105 requires the licensee to release from Tule Diversion Dam a minimum “target” flow of 4 cubic feet per second (cfs) in dry water years and a minimum “target” flow of 2 cfs from Doyle Springs Diversion Dam where the “target” flow is defined as the daily average flow at each dam and an instantaneous flow of not less than 10 percent of the daily average flow. However, the FS’s condition 5 filed with the Commission on October 31, 1989 and November 26, 1991, requires the licensee to release from Tule Diversion Dam a minimum “target” flow of 4 cfs in dry water years and a minimum “target” flow of 2 cfs from Doyle Springs Diversion Dam, **or the natural instream flow, whichever is less.** The licensee requests that article 105 be revised to make it clear that the minimum flow requirements are dependent on and subject to the natural instream flow of the Tule River at Tule Diversion Dam and Doyle Springs Diversion Dam.
